

KAMPASS — Release Document

Product: KAMPASS · Your KAM Assistant **Release:** v1.3 · 29 September 2026 · pSpark 2026, use case 5 (Digital KAM)
Build: commit `2abf93f` · API and web deployed to Azure resource group `pSpark-Kratos`

1. Access

Application: <https://proud-ground-0a620d100.3.azurestaticapps.net/login> **API documentation (Swagger):** <https://app-pspark-kratos-6jti.azurewebsites.net/swagger>

On the login page, choose **Sign in**; **About the product** holds the pitch deck and PRD. The sign-in card fades in when the 10-second intro video finishes. Press any key or click anywhere to show it straight away.

User types and demo sign-ins

All users share one demo password: `Kratos@2026` (case-sensitive).

User type	Username	Password	Lands on	Can do
Executive	<code>exec@kratos.demo</code>	<code>Kratos@2026</code>	Executive dashboard	See every account (read-only), dashboard tiles, executive brief with a read-only AI bot, comment on accounts, approve or reject SOWs, reactivate retired accounts, executive and BD export packs
Admin	<code>admin@kratos.demo</code>	<code>Kratos@2026</code>	Admin console	Master data (offerings, strategies, brickwall criteria, checklist questions), scoring weights, users, MACs, AI usage and evaluations, security findings and audit log. No access to account plan content
Account manager	<code>priya.am@kratos.demo</code>	<code>Kratos@2026</code>	MAC view	Own accounts: full S1–S12 plan, goals, opportunities, Voice of Customer, documents, import/export, KAMPASS assistant, add/retire accounts, add MACs
Account manager	<code>arjun.am@kratos.demo</code>	<code>Kratos@2026</code>	MAC view	As above, different accounts
Account manager	<code>deepa.am@kratos.demo</code>	<code>Kratos@2026</code>	MAC view	As above, different accounts
Account manager	<code>nbd.lead@kratos.demo</code>	<code>Kratos@2026</code>	MAC view	As above; owns the New Business MAC
Account manager	<code>ebd.lead@kratos.demo</code>	<code>Kratos@2026</code>	MAC view	As above; owns the Existing Business MAC

Five wrong passwords in 15 minutes lock that user for 15 minutes; use another user of the same type meanwhile. All demo data is fictional; no customer data is used.

2. What's in this release

Account managers

- **Digital account plan (S1–S12)** mirroring the KAM workbook tabs, with completion and staleness per section, optimistic save conflicts, versions, diffs and score trends.
- **Automatic scoring:** opportunity, brickwall, checklist, perception, completion, health and a Low/Medium/High risk level with reasons.
- **Goals:**
 - 1-year and 3-year goals on an account or a MAC.
 - The MAC is pre-selected with its account count.
 - "Brainstorm with KAMPASS" gives horizon-specific prompts and suggested goals that prefill the form.
 - Tracking shows OnTrack, AtRisk, OffTrack or Achieved.
- **Opportunities tracked against goals:** each opportunity can contribute to a goal and shows its share of the remaining gap. Each goal lists its contributing opportunities and how much of the gap the pipeline covers.
- **Voice of Customer:** paste or upload a transcript, meeting notes or an email. You get a summary, sentiment, signals and proposed actions with source quotes; accepted proposals become tracked actions.
- **KAMPASS assistant** (on every page):
 - answers questions;
 - finds patterns and cross-sell opportunities across accounts;
 - turns statements like "CIO perception is now 4" into proposed updates, applied on one click, after which health recalculates.
- **Next best action** per account: what to do, whose help to seek, which channel and why.
- **MAC view:** clickable KPI cards, an Accounts/Champions tab (contact cards with LinkedIn links), add and retire accounts, executive comments shown in the list.
- **Documents per account**, and **new business** → **existing business** conversion once an executive approves the signed SOW.
- **Data Intelligence Report:** import an Excel KAM workbook with a validation report, mapping tooltips and a downloadable template. Export back in the same structure.
- Guided tour, light/dark theme toggle.

Executives

- **Executive dashboard** tiles:
 - active accounts
 - run rate
 - pipeline
 - average health
 - high-risk accounts
 - overdue actions
 - stale sections
 - goals on track
 - SOWs awaiting sign-off
 - champions
- A by-MAC table and top opportunities.
- **Executive brief** with a read-only "Ask about the portfolio" bot; it never changes data.
- **Comments on accounts**, visible to account managers on the account and in the MAC list.
- SOW sign-off and account reactivation.

Admins

- Configuration without code changes: master data, scoring weights, users, MACs.
- AI usage against the daily token budget, and agent evaluation results.
- Security: findings from the Security Sentinel (with AI explanations), audit log, on-demand scan.

Login and product pages

- Background video with the sign-in card fading in after the intro.
- "About the product": an 8-slide pitch deck, and a PRD & product spec page.

3. Suggested demo path (10 minutes)

1. **Login page**: watch the intro, then open **About the product** → pitch deck.
2. **Account manager** (`priya.am@kratos.demo`):
 - MAC view → click the **At high risk** card.
 - Open **Harbourline Freight**.
 - Click **Suggest next best action**.
 - Go to the **Goals** tab → **Plan a goal** → choose **3-year** → **Brainstorm with KAMPASS** → "Use this" → Plan goal.
 - Go to **S6 Opportunity matrix** → link an opportunity to the goal and watch its share of the gap.
 - Open **Voice of Customer** → paste call notes → accept a proposed action.
 - Ask KAMPASS: "Update: CIO perception is now 4 after today's meeting" → Apply, and watch health change.
3. **Executive** (`exec@kratos.demo`):
 - Dashboard tiles.
 - **Executive brief** → ask "Which accounts are at risk and why?".
 - Open an account and add a comment. Sign back in as the account manager to see it.
4. **Admin** (`admin@kratos.demo`): Admin → Scoring weights, then **Security** → **Run scan**.

4. Environments

Environment	Web	API	Database	AI
Azure (demo)	Static Web App <code>swa-pspark-kratos</code>	App Service <code>app-pspark-kratos-6jti</code> (Staging mode)	SQLite on App Service storage, fictional seed data	Gemini (model fallback chain)
Local	<code>http://localhost:5173</code>	<code>http://localhost:5080</code>	<code>src/Kratos.Api/kratos.db</code>	Keys from <code>.env</code> ; local demo password is set in <code>appsettings.Development.json</code>

5. Quality at release

Check	Result
Backend unit + integration tests	57 / 57 passed

Check	Result
Web tests, typecheck, lint, build	84 / 84 passed; clean
End-to-end against Azure (v1.1 + v1.2, AI included)	47 / 47 passed
End-to-end v1.3 (goals, brainstorm, contribution)	10 / 10 passed
Postman / Newman collection	30 requests, 35 assertions, 0 failures
Real-browser check of the live site	Login video, About, goal form, executive dashboard, champions, all roles; no console errors

6. Known issues and limitations

#	Item	Workaround / plan
1	The sign-in card waits for the intro only once per browser session	Use a private window to show the intro again
2	<code>?tab=champions</code> deep link opens the Accounts tab	Click the Champions tab
3	AI answers take 5–30 s; a busy model occasionally returns "AI unavailable"	Try again; the gateway already retries across three Gemini models
4	Demo sign-in uses local passwords, and secrets sit in App Service settings	Move to Entra ID and Key Vault (needs a role grant)
5	SQLite database; schema changes reset demo data	Move to Azure SQL with EF migrations
6	Container build blocked on the office network	Build in GitHub Actions

7. Security notes for this release

- These are shared **demo** credentials for fictional data. Change or disable them after the event, and before any real data is loaded.
- Rotate the Gemini API key used during the event.
- Security controls are listed in [security.md](#); technical details are in [TECHNICAL.md](#).

8. Change history

Version	Commit	Summary
v1.0	<code>4304247</code>	Digital KAM platform: S1–S12 plan, scoring, versions, actions, views, import/export, AI agents, security
v1.1 + v1.2	<code>0cb17fa</code>	KAMPASS rebrand, assistant, Voice of Customer, documents, SOW conversion, three roles, goals, champions, executive dashboard, comments
v1.3	<code>21f95bc</code>	Goal horizons and brainstorming, opportunity-to-goal tracking, login video, About the product
v1.3.1	<code>2abf93f</code>	Sign-in card fades in after the intro video
